

Vaccine Hesitancy Project

We are delighted to announce the completion of our Vaccine Hesitancy Project. Funding for this project has been made possible by the Canadian Association of Community Health Centres and the Public Health Agency of Canada.

The project focussed on the creation of tools such a social media posts, pamphlets, and posters to combat vaccine hesitancy. The tools have been translated from English into Arabic, Tigrinya, Somali, Pashto, Dari, and Karen-Burmese. The tools will be available through our clinic, Regina Catholic Family Services, and the Regina Open Door Society. Also, a guide to promote vaccine confidence was created to assist medical providers and settlement specialists to engage vaccine hesitant clients. The guide serves as a supplement and the SMA's C-19 vaccine guidelines.

Additional funding was granted for similar tools providing information on covid vaccination for five- to eleven-year-old children. These tools have been translated into six languages and will be shared with various agencies.

Thank you to Executive Director, Dawn Martin; researcher, content creator and project coordinator Katherine Lyseiko; graphic designer, Elaine Mollard; and translators: Fidaa Said, Lulia Fessahaie, Habon Sheikhabdurahman, Salma Azimi, and Pusay Ly.

لماذا يجب اخذ اللقاح؟
اللقاح يعمل على حماية الأشخاص الذين يأخذون اللقاح والأشخاص المحيطين بهم من عائلات وتجمعات وأطفال وأي شخص يتكون فيه

عمومي واكسين
واكسين چيست و چگونه كار ميكنند بعضي چگونه اثر دارد؟
واكسين نوع از دارو است كه شامل اجزا است. و مردم را از اثر عفونت اذنين خطرناك و چنان گشاده مخالفت ميكنند. واكسين شمارا از مريض شدن به امراض محافظت مي كند. واكسين نسبت به ديگر دارو هاي كه امراض را معالجه مي كند متفاوت است.

دكرونا واكسين
خنګه په ټولنيز رسانه كي غلط معلومات وټاكئ او دهغه سره مبارزه وكړو.
دكرونا واكسين د بې ضرورت اړه معلومولو څخه ښه په ځانگړي رسنه كي غلط معلومات وټاكئ او دهغه سره مبارزه وكړو. (سپټمبر ۲۰۲۰)

Talaalka Covid 19
LA SOCODSII ASXAABTAADA IYO GOYSKAADA
Marka qof aad taqaanid uu qeybinayo oo dadka la wadeegayo war ama xog aan sax aheyn waxaad ula xiriiri kartaa adigoo u sheegayo sababta xogtu ama warku been u yahay kuna kabya ilo sumcad leh oo warka saxda ah codeeynayo.

COVID-19 is an infectious disease caused by the SARS-CoV2 Virus. People who fall sick with C-19 can either become mildly ill and show no signs of illness or they may become severely ill with the disease.
Some people will recover without any medical help and some people will need to be cared for in the hospital. Some may never recover and die.
